

For advanced video laryngoscopy, the choice has never been more clear.

The GlideScope® Cobalt AVL features a new digital color monitor and digital camera, providing a consistently clear, DVD-quality view, enabling swift intubation.

The Cobalt AVL gives you two single-use options designed for a wide range of patient weights and sizes—from small to morbidly obese—ideal for demanding OR, ED, and ICU settings.

Add real-time recording and an onboard video tutorial, and these versatile products are a clear choice in advanced video laryngoscopy.

#### ADVANCED AIRWAY VIEWS

- ▶ Digital color monitor with DVD-quality resolution
- ▶ Reusable video baton with digital-resolution camera
- ▶ Advanced resolution output for OR theater viewing
- ▶ Anti-fogging mechanism resists lens contamination

#### ADVANCED USER FEATURES

- ▶ Integrated, real-time recording helps confirm tube placement and facilitate teaching
- ▶ Onboard *4-Step Technique* tutorial makes AVL easy to use, learn, and teach
- ▶ Ergonomic design and rugged construction for multiple clinical applications
- ▶ 2 sterile, single-use Stats, designed for small to morbidly obese patients

## Advanced Video Laryngoscopy

Real-time recording. DVD clarity.

Representative airway view.

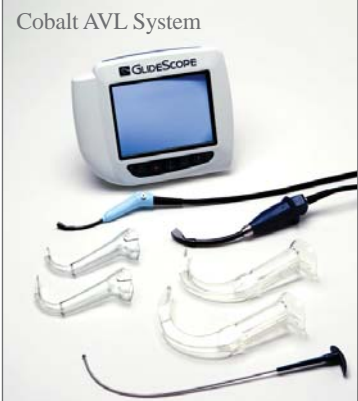

**Applications**

- First-use intubations, replacing direct laryngoscopy
- Normal or restricted oropharyngeal views
- Cormack-Lehane grades I-IV laryngeal views
- Trauma airways—excellent when dealing with blood and secretions in the airway
- Nasal tracheal intubation
- Video-guided tube exchange in the ICU

**System Components**

- Digital, DVD-quality color monitor
- Reusable video baton with digital camera
- Single-use Stat, choice of 2 sizes (box of 10)
- Protective video baton cradle
- Choice of mobile stand or IV pole mount
- User’s Manual and Quick Reference Cards

**GlideScope® Products and Systems—Designed for 1<sup>st</sup> Pass Success**
